

CONTENTS

Foreword	4
Preface	5
1 Prologue	
Biotechnology Before Science	6
2 Beer	
Where Biotechnology Began	11
3 Lactic Acid Fermentation	
Food Preservation, Flavour and Health	32
4 Oriental Food	
Products of a Different Environment	43
5 Antibiotics	
The End of Infectious Disease?	48
6 Food, Feed and Fuel	
Satisfying Human Needs	59
7 Enzymes	
Tools of Nature	73
8 Genetic Engineering	
A New Science or Just Another Method?	91
9 Pharmaceuticals and Flavours	
Biologically Active Molecules	106
10 Epilogue	
Biotechnology into the Third Millennium	115
Bibliography	120
