List of Contributors .....	xiii
Preface .....	xv
<b>CHAPTER 1 Malts .....</b>	<b>1</b>
<i>N. Davies</i>	
Introduction.....	1
What Should a Malt Analysis Tell You? .....	2
Analytical Variance .....	6
Laboratory Analysis and Brewery Performance.....	8
Prevalence of Food Safety Tests—Does It Really Reduce Risk? .....	12
Sustainability as a Metric for Malt Supply.....	14
Flavor Specification—Useful, a Distraction, or Measure of the Future?.....	17
Malt Sensory Analysis Can Improve Selection and Specification of Specialty Malt .....	18
Malt Color—Surely One of the Easiest Parameters to Specify?.....	19
Is Not Color Much Easier to Determine by Eye? .....	20
Summary .....	21
References.....	22
<b>CHAPTER 2 Adjuncts .....</b>	<b>27</b>
<i>G. Stewart</i>	
Introduction.....	27
Definition .....	27
Functions in Brewing .....	28
Adjunct Starch .....	29
Use of Liquid Adjuncts .....	40
Priming Sugars.....	40
Malted Cereals.....	41
Wheat Malts.....	41
Rye .....	42
Sorghum.....	43
Summary .....	44
References.....	44
<b>CHAPTER 3 Hops .....</b>	<b>47</b>
<i>T.R. Roberts</i>	
Introduction.....	47
Impact of Hops on Beer Quality .....	47

Turbidity.....	119
Hot Break.....	119
Cold Break.....	119
Dimethyl Sulfide/S-Methyl Methionine.....	119
pH.....	119
Color.....	120
Bitter Units.....	120
Viscosity.....	121
Zinc.....	121
References.....	121
<b>CHAPTER 7 Alcohol and Its Measurement.....</b>	<b>123</b>
<i>G. Spedding</i>	
On Alcohol, Alcoholic Strength, and Measurements.....	123
The Properties of Alcohol and Their Measurement.....	123
Precision and Accuracy.....	124
Accuracy.....	127
Precision.....	127
Outline of Methods to Measure Alcohol.....	128
The Methods Used to Measure Alcohol Content and Current Applications.....	129
Chromatographic Methods for Alcohol Determination (Gas Chromatography and High-Performance Liquid Chromatography).....	130
Density and/or Specific Gravity Measurements for Alcohol Determination.....	131
Ebulliometric Measurements of Alcohol.....	133
Enzymatically Measuring Alcohol via Spectroscopic Methods and Bioelectrochemical Cells.....	133
Refractometer Measurements for Assisting in Alcohol Content Determinations.....	135
Alcohol Measurements Using Spectroscopy.....	135
Coupled Oscillating Density Meters and NIR Alcohol Meters.....	136
Fermentation and Alcohol Production: The Mass Balance of Fermentation, Carl Balling, and the Theoretical Basis for Brewing Parametrics.....	137
A Summary of Beer Calculations.....	139
Density Meter/NIR Analyzer Calculations and the Tabarie Relationship—An Important Interlude.....	142
Measuring Alcohol Content in the Modern Brewery and Brewery Laboratory: Tables, Algorithms, and Software.....	142
Introduction to an Online Calculator and Brewers' Calculations Software.....	144

Summary .....	144
Acknowledgments.....	145
References.....	145
<b>CHAPTER 8 Flavorsome Components of Beer .....</b>	<b>151</b>
<i>C.W. Bamforth</i>	
Approaches to Measuring Substances Impacting Beer Flavor.....	151
Bitterness .....	152
Sweetness.....	153
Sourness .....	153
Saltiness .....	153
Other Inorganic Ions.....	153
Vicinal Diketones (VDKs) .....	153
Dimethyl Sulfide.....	154
Methods for Measuring Other Volatile Materials in Beer.....	154
Flavor Stability Assessment .....	154
References.....	154
<b>CHAPTER 9 Dissolved Gases .....</b>	<b>157</b>
<i>C.S. Benedict</i>	
Theory: Laws Governing Gases Dissolved in Liquids .....	157
Dalton's Law.....	157
Henry's Law.....	158
The Ideal Gas Law .....	158
Units: Dissolved Gas Nomenclature .....	158
Oxygen.....	158
Carbon Dioxide.....	158
Nitrogen .....	159
Why Measure Dissolved Gases?.....	159
Measurement Technologies—O <sub>2</sub> , CO <sub>2</sub> , and N <sub>2</sub> .....	160
Oxygen.....	160
Carbon Dioxide.....	162
Nitrogen .....	163
Measuring Dissolved Gases: Challenges .....	163
General Principles.....	163
Problems Specific to Wort.....	164
Wort Oxygen Measurements .....	164
Challenges in Beer.....	167
References.....	174
<b>CHAPTER 10 Controlling Beer Foam and Gushing .....</b>	<b>175</b>
<i>L.T. Lusk</i>	
Introduction.....	175
Quality Assurance Methods and Troubleshooting.....	175

Good Manufacturing Practices and Brewing Process	
Optimization .....	177
Ingredients .....	177
Pale Malted Barley .....	177
Lipoxygenase-Free Pale Malted Barley .....	178
Specialty Malts .....	178
Unmalted Barley .....	178
Wheat .....	179
Other Adjuncts .....	179
Process Variables and Challenges .....	181
Mashing and Lautering .....	181
Low Thermal Heat Load Wort Boiling .....	181
Fermentation .....	182
Beer Transfer .....	182
Chillproofing .....	182
Packaged Beer .....	182
Gushing and Overfoaming .....	183
Primary Gushing .....	183
Remedial Measures for Primary Gushing .....	184
Hops, Advanced Hop Products, and Gushing .....	186
Secondary Gushing .....	186
Diagnosing Secondary Gushing Causes .....	189
What Are Consumer Expectations? .....	189
Acknowledgments .....	190
References .....	190
<b>CHAPTER 11 Color .....</b>	<b>199</b>
<i>A.J. de Lange</i>	
Introduction .....	199
Human Color Perception—Three-Dimensional Color Space .....	203
Path .....	205
Obtaining Visible Beer Color (Tristimulus) Data .....	206
Beer—Bouguer—Lambert Law .....	207
Implications of the CNS hypothesis .....	208
Beer Spectra .....	210
Details of ASTM E-308 Prescription .....	213
Step 1: Obtaining Beer/Wort Absorption/Transmission	
Spectrum Data .....	213
Step 2: Obtaining Illuminant Spectral Power	
Distribution Data .....	231

Step 3: Scale and Multiply ..... 233  
 Step 4: Compute CIE X, Y, and Z (Tristimulus) ..... 233  
 Step 5: Mapping into Useful Color Spaces ..... 234  
 Beer Color as Part of Quality Control .....244  
     Modifying Beer Color ..... 245  
 Summary and Conclusion .....247  
 References.....248

**CHAPTER 12 Haze Measurement.....251**

*C.W. Bamforth*  
 The Nature of the Physical Instability of Beer .....251  
 The Measurement of Haze .....252  
 Measurement of Bits .....252  
 Prediction of the “Haze Stability” of Beer .....253  
 The Investigation of Beer Hazes .....254  
 A QA Approach to Minimizing Colloidal Problems in Beer.....255  
 References.....255

**CHAPTER 13 Sensory Analysis in the Brewery.....257**

*W.J. Simpson*  
 Introduction.....257  
 Information Required by the Brewery From Sensory Analysis  
 of Beer .....257  
     Objectives of Sensory Analysis of Beer ..... 257  
     Sensory Specifications for Beer ..... 258  
     Actions Which Can Be Taken in Response to the Results  
     of Sensory Tests..... 258  
 Evaluation of Raw Materials and Process Aids.....261  
     Malt and Adjuncts ..... 261  
     Brewing Water ..... 262  
     Hops and Hop Products ..... 262  
     Yeast..... 262  
     Filter Aids and Adsorbents..... 262  
     Process Gases Such as Carbon Dioxide, Air, and Oxygen ..... 263  
 Evaluation of In-process Samples .....263  
 Evaluation of Packaging Materials .....264  
 Evaluation of Packaged Beer .....264  
 Product Management .....265  
     Management of Product Consistency..... 265  
     Management of Product Conformance ..... 265  
     Management of Product Quality ..... 267

Tasters .....	269
Recruitment and Selection of Candidate Tasters .....	270
Screening of Candidate Tasters .....	271
Training of Tasters .....	271
Management of Taste Panels .....	277
Management of Taster Welfare .....	278
Assessment of Taster Competence .....	278
Practical Aspects of Beer Tasting .....	280
Taste Room Facilities .....	280
Planning of Taste Sessions .....	281
Statistical Analysis of Sensory Data .....	286
Reporting of Sensory Data .....	287
References.....	288
<b>CHAPTER 14 Microbiology.....</b>	<b>291</b>
<i>A.E. Hill</i>	
Introduction.....	291
Cereals .....	292
Water .....	294
Yeast.....	297
Hops .....	298
Sugars and Syrups .....	299
Brewing Process .....	300
Brewery Surfaces.....	300
Air and Process Gases .....	302
Wort.....	302
Fermentation .....	307
Product .....	308
Bright Beer .....	308
Packaging.....	310
Dispense.....	310
Summary .....	311
References.....	311
Appendix.....	317
Index .....	341
