

The Brewing Science Laboratory

Chapter 1 Introduction

**Overview of the Brewing Process
Quality**

**Maintaining Quality
Measuring Quality
Investing in Quality**

Chapter 2 Implementing Safety and Quality

**What Is HACCP?
Implementing a Successful HACCP Program
American Society of Brewing Chemists**

ASBC Methods of Analysis

What's Wrong with My Beer?

**Common Off-Flavors
How to Attack Off-Flavors
Using New Ingredients (or the Same Ingredient from Another Supplier)**

Chapter 3 The Brewery Laboratory

The Brewery Laboratory

**Overview of the Lab
Do You Need a Scientist?
Who Performs QA Procedures?**

The Design of a Brewery Laboratory

**Space Requirements
Supplies and Chemicals
Laboratory Safety
Fire Safety
Common Instruments**

A Brewery on a Budget

The Essentials Are Based on Your QC Requirements
A Lab for Under \$10,000
A Lab for Under \$1,000

Chapter 4 The Chemistry Behind the Analysis

Essentials of Chemistry

Atoms and Radioactivity
Drawing Atoms
Ions: Atoms with Charges
Combining Atoms
Writing Chemical Formulas
Collections of Atoms
Calculating Ions in Water
pH
Chemical Reactions
Line Drawings
Organic Molecules in Brewing

Chapter 5 Essentials of Biology and Biochemistry

The Barley Seed
The Hop Cone
Wort: The Perfect Growing Environment
Types of Microorganisms
The Yeast Cell
Basic Metabolism

Glycolysis
The Krebs Cycle
Oxidative Phosphorylation
Fermentation
Requirements for Metabolism

Chapter 6 Working in the Lab

Laboratory Glassware

Types of Glassware
The Meniscus
Using Graduated Glassware
Using Volumetric Glassware

Filtering Liquids
Distillation

Handling Chemicals

Obtaining the Mass of a Solid or Liquid
Obtaining the Volume of a Liquid
Preparing a Solution from a Solid
Preparing a Solution by Dilution
Distilling Liquids

Handling Microbes

Sterile Versus Sanitized Versus Clean
Glassware Used in the Micro Lab
Proper Use of the Microscope
Petri Dishes and Agar
Broths and Growing Yeast

Chapter 7 Instruments and the Laboratory

Instruments in the Laboratory

Instruments Versus Equipment
Pros of Using Instruments for Analysis
Cons of Using Instruments for Analysis

Laboratory Conditions for Optimal Instrument Operation

Temperature
Electrical Power
Humidity
Dust
Lighting

Instrument Upkeep and Maintenance

Chapter 8 Reporting Your Results

Graphing with Microsoft Excel or Another Spreadsheet Program

Entering Results
Standard Curves
Plotting Results, Cumulative Sum Charts, and Trending

Tables and Record Keeping

Using Functions

Macros and Advanced Excel Functions

Programming 101

Chapter 9 Sensory Analysis

Keeping a Sensory Notebook

Appearance: Making a First Impression

Flavor: Training the Palate

Aroma: A Key Component of Taste

The Sensation of Tasting

Aroma and Overall Flavor

Sensory Thresholds

Sensory Overload

How to Set up Your First Sensory Panel

Trusting Your Panel

Types of Sensory Analysis

Triangle Test

Paired Comparison Test

Tetrad Test

Threshold Test

Performing Sensory Analysis

Chapter 10 Colorimetric Analysis

Eyes Are the Instrument

People as Instruments

Testing for Presence Versus Testing Against a Standard

Making a Reference Chart

Colorimeter Setup

Minimum and Maximum Concentrations

Colorimetric Methods

Chapter 11 Spectrophotometric Analysis

What Is a Wavelength?

**Infrared, Visible, Ultraviolet, and Beyond
Relationship to Colorimetric Methods**

General Instrument Design

**Fixed or Single Wavelength
Continuous Wave
Fourier Transform**

Infrared Analysis

**Pros and Cons of Infrared Analysis
Using Infrared Analysis in Brewing**

UV-Vis Analysis

**Pros and Cons of UV-Vis Analysis
Using UV-Vis Analysis in Brewing**

Chapter 12 Chromatography

Polar Versus Nonpolar

**London Dispersion Forces, Dipole–Dipole Forces, and Hydrogen Bonding
Mobile and Stationary Phases**

General Instrument Design

**Thin-Layer Chromatography
Gas Chromatography
High-Performance Liquid Chromatography**

Chapter 13 Other Instruments in the Brewery Laboratory

Density Meters

Hydrometers
Gravimetric Density Meters
Coriolis Density Meters

Refractometers
Viscometers
Olfactometers
Foam Measurements

Chapter 14 Microbes

Early Research and Inventions
Sterilization Revisited
Microbes and the Brewing Process
Making Media

Broths, Plates, and Slants

Growing Microbes

Liquid Media
Solid Media
Aseptic Sampling
Membrane Filtration

Identifying Bacteria

Reading Plates
Gram Stainings
Polymerase Chain Reaction

Chapter 15 Data Sheets for *ASBC Methods of Analysis*

ASBC Malt 4: Extract
ASBC Malt 6A: Diastatic Power
ASBC Malt 6B: Diastatic Power (Rapid Method)
ASBC Malt 15B: Grist—By Manual Sieve
ASBC Hops 6A: α - and β -Acids in Hops and Hop Pellets— α - and β -Acids by Spectrophotometry
ASBC Hops 13: Total Essential Oils in Hops and Hop Pellets by Steam Distillation
ASBC Hops 15: Iso- α -Acids in Isomerized Hop Pellets by High-Performance Liquid Chromatography 1993

ASBC Hops 17: Hop Essential Oils by Capillary Gas Chromatography–Flame Ionization Detection

ASBC Wort 5: Yeast Fermentable Extract

ASBC Wort 12: Free Amino Nitrogen (International Method)

ASBC Wort 22: Wort and Beer Fermentable and Total Carbohydrates by High-Performance Liquid Chromatography (HPLC)

ASBC Wort 23A: Wort Bitterness—Bitterness Units by Spectrophotometry

ASBC Wort 23C: Wort Bitterness—Iso- α -Acids in Wort by High-Performance Liquid Chromatography

ASBC Beer 4A: Alcohol—Beer and Distillate Measured Volumetrically

ASBC Beer 4C: Alcohol—Alcohol Determined Refractometrically

ASBC Beer 4D: Alcohol—Ethanol Determined by Gas Chromatography

ASBC Beer 10A: Color—Spectrophotometric Color Method

ASBC Beer 11C: Protein—By Spectrophotometer

ASBC Beer 13C: Dissolved Carbon Dioxide—Manometric/Volumetric Method

ASBC Beer 22A: Foam Collapse Rate—Sigma Value Method (Modified Carlsberg Method)

ASBC Beer 23A: Beer Bitterness—Bitterness Units (International Method)

ASBC Beer 23C: Beer Bitterness—Iso- α -Acids by Solid-Phase Extraction and High-Performance Liquid Chromatography

ASBC Beer 25D: Diacetyl—Ultraviolet Spectrophotometer Method

ASBC Beer 38: Magnesium and Calcium

ASBC Yeast 4: Microscopic Yeast Cell Counting

ASBC Yeast 6: Yeast Viability by Slide Culture

ASBC Yeast 9: Morphology of Giant Yeast Colonies (International Method)

ASBC Yeast 11B: Flocculation—Absorbance Method

ASBC Sensory Analysis 7: Triangle Test (International Method)

ASBC Sensory Analysis 18: Tetrad Test
