

Building a Sensory Program: A Brewer's Guide to Beer Evaluation

Foreword

Acknowledgments

Introduction

Chapter 1

The Value of a Sensory Program

**The Goal of Your Sensory Program
Quality Control**

Quality Defined
Instrumental Quality Control
Sensory Quality Control

**Beyond Quality Control
Building a Culture of Sensory
Best Practices and Principles for Running a Sensory Program
Developing Your Own Sensory Philosophy**

Chapter 2

The Senses: How Flavor is Made

The Sense of Taste

Anatomy of the Tongue
Basic Tastes
Other Elements Influencing Taste Perception

The Sense of Smell

Aroma Thresholds
Orthonasal and Retronasal Detection

The Sense of Touch

Body
Carbonation

Alcohol Warmth
Astringency
Metallic
Capsaicin
Foam Volume and Quality
Other Sensations

The Sense of Sight

The Sense of Sound

Chapter 3

Bias and the Brain

How Bias Occurs

Confirmation Biases

Expectation Error
Selective Perception
Avoiding Confirmation Biases
Mutual Suggestion

Information Errors

Logical Error
Halo Effect

Presentation Order Biases and Effects

Contrast Effect
Pattern Effect
First Sample Effect
Limiting Presentation Order Effects

Other Biases and Effects

Default Effect
IKEA Effect
Lack of Motivation

Panel Leader Biases

Chapter 4

Sensory Evaluation Techniques

Types of Sensory Data Assessment Techniques

Visual Assessment
Visual Assessment Standards
Aroma Assessment
Aroma Assessment Standards
Recognition Training and Testing
Tasting Assessment
Taste Assessment Standards
Mouthfeel Assessment
Mouthfeel Assessment Standards

Chapter 5

Beer Flavor

Ingredient Flavor Descriptors

Malt-Derived Flavor
Hop-Derived Flavor
Fermentation-Derived Flavor
Water-Derived Flavor
Other Flavors

Specific Attributes

Diacetyl
Acetaldehyde
Organic Acids
Sulfur Compounds
Esters
Phenols
Tetrahydropyridine (THP)
Metallic
Oxidation Flavors

Chapter 6

Quality Control Tests

The True-to-Target Test
Analyzing True-to-Target Data
Analyzing Data with a Small Panel

Chapter 7

Affective, Descriptive, and Difference Tests

Basic Statistics and Experimental Design

Decision Errors
Setting Action Standards

Affective Tests

Acceptance Test (Hedonic Test)
Preference Test
Ranking Test

Descriptive Tests

Description Test

Difference Tests

Types of Difference Tests
Triangle Test
Tetrad Test

Statistical Analysis of Difference Tests

Hypothesis Testing
Alpha and Beta Risk
Balancing Alpha and Beta
Similarity Testing: How Large of a Difference is Acceptable?
Using Statistical Reference Tables

Chapter 8

Planning, Equipment, and Best Practices

Creating a Space

Location
Testing Room Considerations
Preparation Room Considerations

Supply Considerations

Sample Prep Supplies
Panel Administration Supplies
Panel Booth Supplies

Managing Data
Conducting a Session

Panel Timing
Sample Preparation
How Many Samples to Serve
Warm Up and Presentation of Samples
Ensuring Panelist Safety

Chapter 9

Selecting, Training, and Maintaining Panelists

Panelist Selection

Understanding Panelist Differences
What if You Have a Low-Acuity Panelist?
How Many Panelists Do You Need?

Panelist Training

General Knowledge and Skills
Brand Training
Flavor Training
Attribute Training

Panelist Maintenance

Upkeep Training
Maintaining Panelist Motivation

Chapter 10

Product Release Panels

Developing Brand Targets **Testing Packaged and In-Process Beer**

Assessing Bright Tank Beer with TTT Spot Checks
Monitoring Additional Process Points
Maintaining Panelist Focus

Product Release Action Standards

Verify Results
What Next If a Batch Has Failed?

Chapter 11

Beyond Beer Release

Maintaining a Beer Library Determining Shelf Life

Shelf Life Sensory Testing Challenges
Shelf Life True-to-Target Test

Chapter 12

Applying Sensory to Recipes and Ingredients

Raw Material Sensory Testing

Malt
Hops
Yeast
Water
Carbon Dioxide
Other Raw Materials

Recipe Adjustment Process Adjustment

Chapter 13

Building New Beers

Defining and Shaping a New Brand
Designing Your Product Development Process
Building a Target Profile

Chapter 14

Blending Wood-Aged Beer

Sending Beer to Wood
Treating Oak as an Ingredient
Tasting In-Process Beer

Taking Notes
Using Multiple Tasters
Logistical Considerations

Blending Beer

Different Approaches to Blending
Tasting Warm, Flat Beer

Finding Your Philosophy

Chapter 15

The Road Ahead

Appendix A – Rank-Sum Test Statistical Tables

Appendix B – Triangle Test and Tetrad Test Statistical Tables

Appendix C – Sample Ballots for Sensory Tests

Product Release True-to-Target (TTT) Test
Shelf Life True-to-Target (TTT) Test
Bright Tank Spot Check True-to-Target (TTT) Test
Acceptance (Hedonic) Test
Preference Test
Ranking Test
Description Test
Single Attribute Scaling Test
Triangle Test
Tetrad Test
